

PROPER PACKING OF THE SAMPLES

1. Place the Fuel/Lube/Water sample (s) and document in the zip lock bag provided in the sampling kit into Maritec Naias IATA box.
- This is to avoid leakage of sample to other shipments.
2. Place the IATA box(s) in the Express Flyer provided and secure/seal them tightly to the shape of the box. Refer below picture.
3. Print the Waybill, Commercial Invoice and MSDS from the sample pick up platform for DHL/FedEx/UPS collection.
4. If there is no IATA boxes available, please use a small carton boxes that fit the samples tightly.

Below are the example of a leak proof packing:

1. A leak-proof primary receptacle (s), filled up to 98% and sealed
2. A leak-proof secondary packing with absorbent material
3. A strong-rigid outer packing
